

CS 03506 - Cybersecurity Management, Policy, and Risk

Assignment 1 – Conditional Branching

Name: Devon Jacob

Instructor: Sally Tarabah

Date: 9/23/2024

Part One: Policy Explanation and Strategy

- Policy Explanation:
 - The importance of this policy from a cybersecurity perspective is that it prohibits unauthorized access to the campus network and information system. A badge displaying the holder's name and photo uniquely identifies students, staff and guests and grants access to those with valid credentials. Also, access to restricted areas is limited only to individuals with proper clearance, thus strengthening the overall security of the campus.
 - The benefits of adopting this policy from a cybersecurity standpoint is that restricts access to secure areas therefore preventing individuals from tampering with hardware, and it allows the campus to monitor and track individuals accessing records, so in the event of a physical breach, along with surveillance cameras, badges can provide accessing records which can help to identify potential suspects.

- Comprehensive Strategy
 - Policy Rollout:
 - To successfully implement this policy on campus, it must be implemented gradually and not the entire campus at once. The first step would be to announce the policy to students and staff through means such as emails, newsletters and posters around the campus.
 - To ensure that this policy is implemented efficiently and effectively the campus allows students and staff to upload their own photos as well as have your photo taken in the office. Once this is done, students and staff have flexible pick-up options including mailing of badge to students address.
 - The implementation phase would begin at the start of the semester, introducing the policy at orientation therefore, focusing specifically on new undergraduate and graduate students.
 - The second phase would be directed towards employees. Once all employees have been informed of the policy, the creation and distribution would take place prioritizing different types of staff during the semester.
 - Phase three would be aimed at part-time students. These are students who attend evening or weekend classes.
 - On-campus residents who are not new students and therefore were not included in the initial phase of the roll out plan, would be the next set of students to implement the policy on.
 - The final phase of the implementation would address continuing commuter students. This will ensure that all students and employees are equipped with their badge
 - Visitors and contractors will receive a badge from the security officers on duty, which must be returned at the end of their visit.

- Training Plan

The training will consist of a brief video that demonstrates how to use the badge effectively. In addition to the video, written instructions will be shared through emails and brochures, ensuring everyone has clear guidance on the proper use of their badges. This combination of visual and written materials will help reinforce understanding and make the information easily accessible to all.

- Measuring Effectiveness

- To assess the effectiveness of this policy, access logs generated by the installed systems will be reviewed. Analyzing these logs will reveal how often badges were scanned, as well as who was granted or denied access to secure areas.

- Enforcement

- Once all phases of the implementation stage are completed and all students and staff have received their badges, to access buildings, stairs, elevator and floor level, you must swipe before access is granted.
- First time offenders not wearing their badge will be given a verbal warning by security guard present at building. In the case of lost or forgotten badge, the security upon verifying students' identity will then grant access. A subsequent fee of \$10 would be required for a reprint.
- Repeated offenders will be issued a written warning documenting the policy violation and the possible disciplinary actions if actions continue.

Part Two

Identification Badges

Policy Version: 1.0

Responsible Executive: Gregory Lewis

Responsible Office: Rowan University Security Manager

Date Issued: 09/20/2024

Date Last Revised: 09/20/2024

Introduction

The identification badge policy is designed to enhance the safety and security of our campus community, as it prevents unauthorized access to the campus. By requiring badges that display the holder's name and photo, we ensure that only individuals with valid credentials can access secure areas. Also, this policy restricts entry to those with proper clearance and enhances campus security by enabling the monitoring and tracking of individuals who access sensitive information.

STATEMENT OF POLICY

Everyone entering Rowan University must always display an authorized identification badge. The badges which include the holder's name, photo, and identification details must be worn in a manner that ensures they are clearly visibly.

PURPOSE

This policy aims to strengthen safety and security at Rowan University by requiring all students, employees, visitors and contractors to display identification badges while on campus. This measure helps to ensure that access to facilities is properly managed and that only authorized individuals are permitted entry.

Guidelines

- Students
 - Badges will display the student's name and photograph and should be always worn.
 - New students who have registered for classes in their first semester will be issued an identification badge.

- Continuing full time and part time students will also be issued badges at designated times throughout the academic year to ensure all students have proper identification.
- Each student badge will have a digital expiration date that aligns with the end of the semester.
- Students must renew their badges at the beginning of each semester. After completing and confirming their registration for the semester, their badge renewal will be approved.
- Staff
 - Badges will show the employee's name, photograph, and the department or office they are associated with.
 - New employees will be issued a badge upon accepting the job offer and before starting their position.
 - Contract based employees' and temporary staff badges will have a digital expiration date that corresponds with their terms of employment.
 - Staff with a change of position or department must also update their badge to reflect changes.
 - All other staff will be required to renew their badges annually.
- Others
 - Visitors will receive a badge upon arrival from the security guard, which will display the university name, logo, and the designation "Visitor."
 - Contractors also will receive a badge upon arrival from the security guard, which will display the university name, logo, and the designation "Contractor."

- Both visitors and contractors are required to visibly display their badges so that security personnel and others can easily see them.
- Visitors must return the badge to the security personnel at the end of their visit while contractors are to return their badge at the end of each day.

EXCLUSIONS

- Exemptions from badges include:
 - Law enforcement officers: Officers on duty shall be exempted from wearing a badge while on campus.
 - Emergency responders: Firefighters, paramedics and other personnels responding to emergency situations will not be required to wear campus identification badges.
 - Special guest: Distinguished guests such as dignitaries or speakers may also not be required to produce campus identification badges.

Access control

- Access permissions are limited or restricted based on badge privileges.
- Students are limited to classrooms, libraries and common areas.
- Employees are granted access to offices and certain secure areas based on their administrative privileges.
- Visitors are limited to public areas or specific areas based on their intended purpose of visit.
- Contractors are granted access to specific areas only designated on their contract.
- Compliance with this policy would be enforced by security personnel.

ENFORCEMENT

- Badges must be always worn in clearly visible manner to security personnel and others on campus.
- Identification badges must remain in original condition and should be modified in any way or form.
- Everyone is responsible for their own badge and must notify authorities if lost or stolen.
- First offenders will be given a verbal warning from the security personnel present.
- Repeated offenders will be issued a written warning documenting the policy violation and the possible disciplinary actions if actions continue.
- After verbal and written warnings have been issued to the individual if the offender continues to adhere to the university policy, then stronger action would be taken such as access restriction.

APPENDIX A: Sample Identification Badge
