

CS 03500 - Foundations of Cybersecurity

Project Part 3:
Malware Attack and Security Breach

Name: Devon Jacob

Instructor: Michael Davie

Date: 10/14/2024

Meeting Objectives

I. Introduction

- Meeting Purpose: To examine the recent malware attack at Fullsoft by identifying the root cause of the breach, discussing lessons learned from similar incidents in other organizations, assessing the impact of the attack, and exploring strategies to mitigate future threats.
-

II. Identifying Factors That May Have Contributed to The Malware Attack

- Phishing – Spam emails
 - Infected websites
 - Software download from third party websites
 - Insider threat – Removable USB drives
-

III. Insights And Lessons Learned from Similar Incidents in Other Organizations

- Malware was delivered through social engineering attacks
 - Companies reported loss of sensitive data
 - Reports of huge financial loss to recover data
 - Attacks could have been prevented with stronger security measures
-

IV. Assess Potential Outcomes of Breach

- Loss of intellectual property
- Financial losses
- Reputational damages
- System disruptions

V. Discuss Mitigation Strategies to Prevent Future Attacks

- Security awareness training
- Backup and recovery
- Defense in depth:
 - i. Application Defenses
 - ii. Operating System Defenses
 - iii. Network Infrastructure Defense
- Threat detection
- Segmentation
