The National Cyber League
A Community Where Cybersecurity Is a Passion

Devon Jacob

NCL Spring 2025 Individual Game Scouting Report

Dear Devon Jacob,

Thank you for participating in the National Cyber League (NCL) Spring 2025 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Spring 2025 Season had 9,216 students/players and 596 faculty/coaches from 510 two- and four-year schools & 288 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from April 11 through April 13. The Team Game CTF event took place from April 25 through April 27. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/Q3E14YBELQ6J

Based on the performance detailed in this NCL Scouting Report, you have earned **3 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/partners.

Congratulations for your participation in the NCL Spring 2025 Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

NCL Spring 2025 Individual Game

The NCL Individual Game is designed for student players nationwide to compete in realtime in the categories listed below. The Individual Game evaluates the technical cybersecurity skills of the individual, without the assistance of others.

Cryptography

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

185 POINTS
OUT OF 385

66.7%
ACCURACY

COMPLETION: **63.2%**

Enumeration & Exploitation

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

55 POINTS
OUT OF 365

100.0%
ACCURACY

COMPLETION: **26.3%**

Forensics

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

35 POINTS
OUT OF 305

50.0%
ACCURACY

COMPLETION: **14.3%**

Log Analysis

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

100 POINTS
OUT OF 300

70.0%
ACCURACY

COMPLETION: **41.2%**

Network Traffic Analysis

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

200 POINTS
OUT OF 300

84.6%
ACCURACY

COMPLETION: **91.7%**

Open Source Intelligence

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

210 POINTS
OUT OF 310

76.5%
ACCURACY

COMPLETION: **72.2%**

Password Cracking

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

250 POINTS
OUT OF 335

93.3%
ACCURACY

COMPLETION: **73.7%**

Scanning & Reconnaissance

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

200 POINTS
OUT OF 300

64.7%
ACCURACY

COMPLETION: **64.7%**

Web Application Exploitation

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

160 POINTS
OUT OF 300

83.3%
ACCURACY

COMPLETION: **55.6%**

Note: Survey module (100 points) was excluded from this report.

Cryptography Module

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.
